Ages Past Casper Parks,2013-09-21 After Benjamin discovered a habitable planet he negotiated opening the colony for humans from across the known universe His home planet of Bootes had been isolated and inhabitants used for experiments by the Kohana Many humans from other star system feared Kohana experiments had altered DNA of humans from Bootes As an exchange of various human cultures is underway those fears faded away When Jermack fell in love with a girl from another star system Benjamin stood proud that his son led the way for others A small number of non human races were afraid of humans intermixing and creating a new race In doing so humans could request another seat on the Council of All and upset the balance of power Opposed to the colony a Cold Blooded Coalition formed and contacted the Kohana for help to an end the new human colony

Alternative Iron Ages examines Iron Age social formations that sit outside traditional paradigms developing methods for archaeological characterisation of alternative models of society In so doing it contributes to the debates concerning the construction and resistance of inequality taking place in archaeology anthropology and sociology In recent years Iron Age research on Western Europe has moved towards new forms of understanding social structures Yet these alternative social organisations continue to be considered as basic human social formations which frequently imply marginality and primitivism In this context the grand narrative of the European Iron Age continues to be defined by cultural foci which hide the great regional variety in an artificially homogenous area This book challenges the traditional classical evolutionist narratives by exploring concepts such as non triangular societies heterarchy and segmentarity across regional case studies to test and propose alternative social models for Iron Age social formations Constructing new social theory both archaeologically based and supported by sociological and anthropological theory the book is perfect for those looking to examine and understand life in the European Iron Age We are so grateful to the research project titled Paisajes rurales antiguos del Noroeste peninsular formas de dominacion romana y explotacion de recursos Ancient rural landscapes in Northwestern Iberia Roman dominion and resource exploitation HAR2015 64632 P MINECO FEDER directed from the Instituto de Historia CSIC and also to the Funda ao para a Ciencia e a Tecnologia Foundation for Science and Technology postdoctoral project SFRH BPD 102407 2014
