Elvis Costello And The Attractions Georg Purvis, 2025-07-30 Whether you know him as Howard Coward, Napoleon Dynamite, or the Emotional Toothpaste and are familiar with his work with The Attractions, The Confederates, or The Imposters, Elvis Costello's career has always been about reinvention, and his vast catalogue of over 30 studio albums since 1977 is a testament to his prolificacy. However, this book focuses on his most acclaimed and accessible work recorded mostly with The Attractions: Steve Nieve, Pete Thomas, and Bruce Thomas between 1977 and 1986, although some other high-profile friends like Nick Lowe, Billy Sherrill, and T Bone Burnett among others show up along the way. From his modest solo beginnings as a pub rocker with attitude on *My Aim Is True* to his cacophonous epitaph to The Attractions on *Blood Chocolate*, this book follows a hectic and at times baffling career trajectory that often ignored commercial fame and fortune in favour of artistic freedom and expression. *Elvis Costello and The Attractions On Track* explores every album, every song, and every non-album B-side or contemporary cast-off from the band's all too brief whirlwind decade of existence. Georg Purvis is the author of *Queen: The Complete Works* and *Pink Floyd In the 1970s*. His first Elvis Costello albums were *This Year's Model* and *When I Was Cruel*, both purchased at the same time in 2002. He has seen Elvis live about a dozen times since 2007 and is always thrilled to report that each concert had been spectacularly different from the previous one. He lives in Philadelphia with his wife Meredith and their two cats, Spencer and William.

**A Cooperative Species** Samuel Bowles, Herbert Gintis, 2013-07-21 A fascinating look at the evolutionary origins of cooperation. Why do humans, uniquely among animals, cooperate in large numbers to advance projects for the common good? Contrary to the conventional wisdom in biology and economics, this generous and civic-minded behavior is widespread.

and cannot be explained simply by far sighted self interest or a desire to help close genealogical kin In *A Cooperative Species* Samuel Bowles and Herbert Gintis pioneers in the new experimental and evolutionary science of human behavior show that the central issue is not why selfish people act generously but instead how genetic and cultural evolution has produced a species in which substantial numbers make sacrifices to uphold ethical norms and to help even total strangers The authors describe how for thousands of generations cooperation with fellow group members has been essential to survival Groups that created institutions to protect the civic minded from exploitation by the selfish flourished and prevailed in conflicts with less cooperative groups Key to this process was the evolution of social emotions such as shame and guilt and our capacity to internalize social norms so that acting ethically became a personal goal rather than simply a prudent way to avoid punishment Using experimental archaeological genetic and ethnographic data to calibrate models of the coevolution of genes and culture as well as prehistoric warfare and other forms of group competition *A Cooperative Species* provides a compelling and novel account of how humans came to be moral and cooperative
