## **Living And Working With The New Medical Technologies Intersections Of Inquiry:**

**Living and Working with the New Medical Technologies** Margaret M. Lock, Allan Young, Alberto Cambrosio, 2000-07-31 This stimulating collection of essays a product of face to face dialogues among anthropologists sociologists and philosopher historians focuses on the newly created biomedical technologies and their application in practice Drawing on ethnographic and historical case studies the authors show how biomedical technologies are produced through the agencies of tools and techniques scientists and doctors funding bodies patients clients and the public Despite shared concerns the contributions reveal that the authors have achieved no consensus about the objectives of their research Deep epistemological divides clearly remain making for provocative reading *Qualitative Research Practice* Clive Seale, 2007 Aimed at the student reader this book demonstrates the benefits of using particular methods from the viewpoint of real life experience It contains chapters written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others **Qualitative Research** David Silverman, 2004-05-25 Common themes in this volume include the centrality of the relationship between analytic perspectives and methodological issues links between social science traditions and the need to expand the paradigm of qualitative research **An Anthropology of Biomedicine** Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09 In this fully revised and updated second edition of *An Anthropology of Biomedicine* authors Lock and Nguyen introduce biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Drawing on historical and ethnographic work the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable malleable entity This second edition includes new chapters on microbiology and the microbiome global health and the self as a socio technical system In addition all chapters have been comprehensively revised to take account of developments from within this fast paced field in the intervening years between publications References and figures have also been updated throughout This highly regarded and award winning textbook Winner of the 2010 Prose Award for Archaeology and Anthropology retains the character and features of the previous edition Its coverage remains broad including discussion of biomedical technologies in practice anthropologies of medicine biology and human experiments infertility and assisted reproduction genomics epigenomics and uncertain futures and molecularizing racial difference ensuring it remains the essential text for students of anthropology medical anthropology as well as public and global health **A Cultural History of Medicine in the Modern Age** Todd Meyers, 2023-02-09 *A Cultural History of Medicine* presents an authoritative survey from ancient times to the present The set of six volumes covers over 2500 years of history charting the changes in medical experience knowledge and practices

throughout history This volume *A Cultural History of Medicine in the Modern Age* explores medicine as a cultural practice from 1920 to the present day As with all the volumes in the illustrated *Cultural History of Medicine* set this volume presents essays on the environment food war animals objects experiences authority and the mind *A Cultural History of Medicine in the Modern Age* is the most authoritative and comprehensive survey available on medicine in the modern period *The Logic of Care* Annemarie Mol, 2008-05-24 What is good care and does more choice lead to better care This innovative and compelling work investigates good care and argues that the often touted ideal of patient choice will not improve healthcare in the ways hoped for by its advocates ***Treating AIDS*** Thurka Sangaramoorthy, 2014-03-26 There is an inherently powerful and complex paradox underlying HIV AIDS prevention between the focus on collective advocacy mobilized to combat global HIV AIDS and the staggeringly disproportionate rates of HIV AIDS in many places In *Treating AIDS* Thurka Sangaramoorthy examines the everyday practices of HIV AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South Florida Although there is worldwide emphasis on the universality of HIV AIDS as a social political economic and biomedical problem developments in HIV AIDS prevention are rooted in and focused exclusively on disparities in HIV AIDS morbidity and mortality framed through the rubric of race ethnicity and nationality Everyone is at equal risk for contracting HIV AIDS Sangaramoorthy notes but the ways in which people experience and manage that risk and the disease itself is highly dependent on race ethnic identity sexuality gender immigration status and other notions of difference Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well being of Haitians a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation to various clinics and hospitals to the social worlds embraced by this immigrant community she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease

*Living with Alzheimer's* Renée L. Beard, 2016-04-26 News of Alzheimer's disease is constantly in the headlines Every day we hear heart wrenching stories of people caring for a loved one who has become a shell of their former self of projections about rising incidence rates and of cures that are just around the corner However we don't see or hear from the people who actually have the disease In *Living with Alzheimer's* Renée L. Beard argues that the exclusively negative portrayals of Alzheimer's are grossly inaccurate To understand what life with memory loss is really like Beard draws on intensive observations of nearly 100 seniors undergoing cognitive evaluation as well as post diagnosis interviews with individuals experiencing late in life forgetfulness Since we all forget sometimes seniors with an Alzheimer's diagnosis ultimately need to be socialized into medicalized interpretations of their forgetfulness In daily life people with the disease are forced to manage stigma and the presumption of incompetence on top of the actual symptoms of their ailment The well meaning public and not

their dementia becomes the major barrier to a happy life for those affected Beard also examines how these perceptions affect treatment for Alzheimer's Interviews with clinicians and staff from the Alzheimer's Association reveal that despite the best of intentions pejorative framings of life with dementia fuel both clinical practice and advocacy efforts These professionals perpetuate narratives about self loss impending cures and the economic and emotional burden to families and society even if they do not personally believe them Yet Beard also concludes that in spite of these trends most of the diagnosed individuals in her study achieve a graceful balance between accepting the medical label and resisting the social stigma that accompanies it In stark contrast to the messages we receive this book provides an unprecedented view into the ways that people with early Alzheimer's actively and deliberately navigate their lives

**An Anthropology of Biomedicine** Margaret Lock, Vinh-Kim Nguyen, 2010-04-26 An Anthropology of Biomedicine is an exciting new introduction to biomedicine and its global implications Focusing on the ways in which the application of biomedical technologies bring about radical changes to societies at large cultural anthropologist Margaret Lock and her co author physician and medical anthropologist Vinh Kim Nguyen develop and integrate the thesis that the human body in health and illness is the elusive product of nature and culture that refuses to be pinned down Introduces biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Develops and integrates an original theory that the human body in health and illness is not an ontological given but a moveable malleable entity Makes extensive use of historical and contemporary ethnographic materials around the globe to illustrate the importance of this methodological approach Integrates key new research data with more classical material covering the management of epidemics famines fertility and birth by military doctors from colonial times on Uses numerous case studies to illustrate concepts such as the global commodification of human bodies and body parts modern forms of population and the extension of biomedical technologies into domestic and intimate domains Winner of the 2010 Prose Award for Archaeology and Anthropology

**Embodying Culture** Tsipy Ivry, 2009-09-30 Embodying Culture is an ethnographically grounded exploration of pregnancy in two different cultures Japan and Israel both of which medicalize pregnancy Tsipy Ivry focuses on low risk or normal pregnancies using cultural comparison to explore the complex relations among ethnic ideas about procreation local reproductive politics medical models of pregnancy care and local modes of maternal agency The ethnography pieces together the voices of pregnant Japanese and Israeli women their doctors their partners the literature they read and depicts various clinical encounters such as ultrasound scans explanatory classes for amniocentesis birthing classes and special pregnancy events The emergent pictures suggest that although experiences of pregnancy in Japan and Israel differ pregnancy in both cultures is an energy consuming project of meaning making suggesting that the sense of biomedical technologies are not only in the technologies themselves but are assigned by those who practice and experience them

*When Experiments Travel*  
Adriana Petryna, 2009-04-27 The phenomenal growth of global pharmaceutical sales and the quest for innovation are driving

an unprecedented search for human test subjects particularly in middle and low income countries Our hope for medical progress increasingly depends on the willingness of the world's poor to participate in clinical drug trials While these experiments often provide those in need with vital and previously unattainable medical resources the outsourcing and offshoring of trials also create new problems In this groundbreaking book anthropologist Adriana Petryna takes us deep into the clinical trials industry as it brings together players separated by vast economic and cultural differences Moving between corporate and scientific offices in the United States and research and public health sites in Poland and Brazil When Experiments Travel documents the complex ways that commercial medical science with all its benefits and risks is being integrated into local health systems and emerging drug markets Providing a unique perspective on globalized clinical trials When Experiments Travel raises central questions Are such trials exploitative or are they social goods How are experiments controlled and how is drug safety ensured And do these experiments help or harm public health in the countries where they are conducted Empirically rich and theoretically innovative the book shows that neither the language of coercion nor that of rational choice fully captures the range of situations and value systems at work in medical experiments today When Experiments Travel challenges conventional understandings of the ethics and politics of transnational science and changes the way we think about global medicine and the new infrastructures of our lives

**A Socio-cultural Perspective on Patient Safety** Justin Waring, 2017-11-01 This edited volume of original chapters brings together researchers from around the world who are exploring the facets of health care organization and delivery that are sometimes marginal to mainstream patient safety theories and methodologies but offer important insights into the socio cultural and organizational context of patient safety By examining these critical insights or perspectives and drawing upon theories and methodologies often neglected by mainstream safety researchers this collection shows we can learn more about not only the barriers and drivers to implementing patient safety programmes but also about the more fundamental issues that shape notions of safety alternate strategies for enhancing safety and the wider implications of the safety agenda on the future of health care delivery In so doing A Socio cultural Perspective on Patient Safety challenges the taken for granted assumptions around fundamental philosophical and political issues upon which mainstream orthodoxy relies The book draws upon a range of theoretical and empirical approaches from across the social sciences to investigate and question the patient safety movement Each chapter takes as its focus and question a particular aspect of the patient safety reforms from its policy context and theoretical foundations to its practical application and manifestation in clinical practice whilst also considering the wider implications for the organization and delivery of health care services Accordingly the chapters each draw upon a distinct theoretical or methodological approach to critically explore specific dimensions of the patient safety agenda Taken as a whole the collection advances a strong coherent argument that is much needed to counter some of the uncritical assumptions that need to be described and analyzed if patient safety is indeed to be achieved

Divided Bodies Abigail A. Dumes, 2020-08-24 While

many doctors claim that Lyme disease a tick borne bacterial infection is easily diagnosed and treated other doctors and the patients they care for argue that it can persist beyond standard antibiotic treatment in the form of chronic Lyme disease In *Divided Bodies* Abigail A Dumes offers an ethnographic exploration of the Lyme disease controversy that sheds light on the relationship between contested illness and evidence based medicine in the United States Drawing on fieldwork among Lyme patients doctors and scientists Dumes formulates the notion of divided bodies she argues that contested illnesses are disorders characterized by the division of bodies of thought in which the patient s experience is often in conflict with how it is perceived Dumes also shows how evidence based medicine has paradoxically amplified differences in practice and opinion by providing a platform of legitimacy on which interested parties patients doctors scientists politicians can make claims to medical truth

*A Companion to the Anthropology of Death* Antonius C. G. M. Robben, 2018-05-11 A thought provoking examination of death dying and the afterlife Prominent scholars present their most recent work about mortuary rituals grief and mourning genocide cyclical processes of life and death biomedical developments and the materiality of human corpses in this unique and illuminating book Interrogating our most common practices surrounding death the authors ask such questions as How does the state wrest away control over the dead from bereaved relatives Why do many mourners refuse to cut their emotional ties to the dead and nurture lasting bonds Is death a final condition or can human remains acquire agency The book is a refreshing reassessment of these issues and practices a source of theoretical inspiration in the study of death With contributions written by an international team of experts in their fields *A Companion to the Anthropology of Death* is presented in six parts and covers such subjects as Governing the Dead in Guatemala After Death Communications ADCs in North America Cryonic Suspension in the Secular Age Blood and Organ Donation in China The Fragility of Biomedicine and more *A Companion to the Anthropology of Death* is a comprehensive and accessible volume and an ideal resource for senior undergraduate and graduate students in courses such as Anthropology of Death Medical Anthropology Anthropology of Violence Anthropology of the Body and Political Anthropology Written by leading international scholars in their fields A comprehensive survey of the most recent empirical research in the anthropology of death A fundamental critique of the early 20th century founding fathers of the anthropology of death Cross cultural texts from tribal and industrial societies The collection is of interest to anyone concerned with the consequences of the state and massive violence on life and death

**Local Babies, Global Science** Marcia C. Inhorn, 2012-11-12 In the late 1990s Egypt experienced a boom period in in vitro fertilization IVF technology and now boasts more IVF clinics than neighboring Israel In this book Marcia Inhorn writes of her fieldwork among affluent elite couples who sought in vitro fertilization in Egypt a country which is not only at the forefront of IVF technology in the Middle East but also a center of Islamic education in the region Inhorn examines the gender scientific religious and cultural ramifications of the transfer of IVF technology from Euro American points of origin to Egypt showing how cultural ideas reshape the use of this technology and in turn how the technology is reshaping cultural

ideas in Egypt     Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault this volume of essays integrates the analysis of security into the study of modern political and cultural theory Explaining how both politics and security are differently problematised by changing accounts of time the work shows how during the course of the 17th century the problematisation of government and rule became newly enframed by a novel account of time and human finitude which it calls factual finitude The correlate of factual finitude is the infinite and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things It then explains how concrete political form was given to factual finitude by a combination of geopolitics and biopolitics Modern sovereignty required the services of biopolitics from the very beginning The essays explain how these politics of security arose at the same time changed together and have remained closely allied ever since In particular the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations     *Ethics, Law, and Aging Review, Volume 7* Marshall B.

Kapp, 2001-09-24 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients In this volume professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place The benefits and costs of litigious legislative and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated Most important chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals     **Institutionalizing Assisted Reproductive Technologies**

Alexander Styhre, Rebecka Arman, 2016-02-12 Reproductive medicine has been very successful at developing new therapies in recent years and people having difficulties conceiving have more options available to them than ever before These developments have led to a new institutional landscape emerging and this innovative volume explores how health and social structures are being developed and reconfigured to take into account the increased use of assisted reproductive technologies such as IVF treatments Using Sweden as a central case study it explores how the process of institutionalizing new assisted reproductive technologies includes regulatory agencies ethical committees political bodies and discourses scientific communities patient and activists groups and entrepreneurial activities in the existing clinics and new entrants to the industry It draws on new theoretical developments in institutional theory and outlines how health innovations are always embedded in social relations including ethical political and financial concerns This book will be of interest to advanced students and academics in health management science and technology studies the sociology of health and illness and
