before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered The Baccalaureate Graham Phillips,Tim Pound,2003-12-16 Every year the UK A Level results bring with them the inevitable tide of questions about the quality and standard of the exams Are they getting easier Is studying for three or four subjects in great detail right in the modern world Can standards and pass rates be sustained One option already available to schools and students is the baccalaureate system With reform of the gold standard A level likely and with qualification reform in Wales and Scotland already a reality this unique book will be essential reading for anyone who needs to know about the post 16 qualifications debate Covering national and international approaches the IBO curriculum reform and political and educational imperatives the book including expert contributions by the leading figures in the bac debate from the HE state and independent schools sectors as well as from political and research fields

Software Architecture: System Design, Development and Maintenance Jan Bosch, Morven Gentleman, Christine Hofmeister, Juha Kuusela, 2013-06-29 For more and more systems software has moved from a peripheral to a central role replacing mechanical parts and hardware and giving the product a competitive edge Consequences of this trend are an increase in the size of software systems the variability in software artifacts and the importance of software in achieving the system level properties Software architecture provides the necessary abstractions for managing the resulting complexity We here introduce the Third Working IEEE/IFIP Conference on Software Architecture WICSA3 That it is already the third such conference is in itself a clear indication that software architecture continues to be an important topic in industrial software development and in software engineering research However becoming an established field does not mean that software architecture provides less opportunity for innovation and new directions On the contrary one can identify a number of interesting trends within software architecture research

The first trend is that the role of the software architecture in all phases of software development is more explicitly recognized. Whereas initially software architecture was primarily associated with the architecture design phase, we now see that the software architecture is treated explicitly during development, product derivation in software product lines at run time, and during system evolution. Software architecture as an artifact has been decoupled from a particular lifecycle phase. *New Trends in Software Methodologies, Tools and Techniques* Hamido Fujita, Vladimír Mařík, 2009.
