England Southern:

Beyond the Medieval Village Stephen Rippon, 2008-11-27 The varied character of Britain's countryside provides communities with a strong sense of local identity. One of the most significant features of the landscape in Southern Britain is the way that its character differs from region to region with compact villages in the Midlands contrasting with the sprawling hamlets of East Anglia and isolated farmsteads of Devon. Even more remarkable is the very English feel of the landscape in southern Pembrokeshire in the far south west of Wales. Hoskins described the English landscape as the richest historical record we possess and in this volume Stephen Rippon explores the origins of regional variations in landscape character arguing that while some landscapes date back to the centuries either side of the Norman Conquest other areas across southern Britain underwent a profound change around the 8th century AD.

Money and Power in Anglo-Saxon England Rory Naismith, 2011-10-06 This groundbreaking study of coinage in early medieval England is the first to take account of the very significant additions to the corpus of southern English coins discovered in recent years and to situate this evidence within the wider historical context of Anglo Saxon England and its continental neighbours. Its nine chapters integrate historical and numismatic research to explore who made early medieval coinage who used it and why. The currency emerges as a significant resource accessible across society and through analysis of its production circulation and use the author shows that control over coinage could be a major asset. This control was guided as much by ideology as by economics and embraced several levels of power from kings down to individual craftsmen. Thematic in approach this innovative book offers an engaging wide ranging account of Anglo Saxon coinage as a unique and revealing gauge for the interaction of society economy and government.
