Finest Creation:

The Finest Creation Jean Rabe, 2005-09 They were the Finest Creations mystically forged creatures of perfection sent by the creators to aid the Fallen mankind during their mortal existence Though they resemble ordinary horses they are highly intelligent capable of communicating telepathically and completely moral They are assigned to bond with individuals of great potential and then protect them from harm while guiding them along a path of virtue This is as it has been for years unto creation but when a young Finest is separated from its mentor before it has been invested with its assignment the result of an ambush by evil forces bent on corrupting men the young equine accepts the charge of two orphans to its care not realizing that man's potential may rest in their future And that the path forward is already being diverted by an evil mastermind whose manipulation of court politics and affairs of state might instigate a new dark age upon the light of civilization

Religion and Violence Jeffrey Ian Ross, 2015-03-04 First Published in 2015 Daily newspaper headlines talk radio and cable television broadcasts and Internet news web sites continuously highlight the relationship between religion and violence These media contain stories about such diverse incidents as suicide attacks by Islamic fundamentalists in Afghanistan Iraq Israel Pakistan and elsewhere and assassinations of doctors who perform abortions by white American Christian true believers in the United States How does one make sense of the role of religion in violence and of perpetrators of violence who cite religion as a motivation This encyclopedia includes a wide range of entries biographies of key figures historical events religious groups countries and regions where religion and violence have intersected and practices rituals and processes of religious violence

Urban Liberalism in Imperial Germany Jan Palmowski, 1999-05-13 Debates about Liberalism in imperial Germany have focused almost exclusively on the national level This book investigates liberal politics in local government the only sphere in which liberals had direct access to power throughout Germany Through the study of one of Germany's most progressive cities Frankfurt am Main Jan Palmowski examines more generally the processes of politicization and policy formulation at the local level He argues that in Frankfurt as elsewhere local affairs had become politicized not around 1900 as is generally assumed but by the 1870s Once in power the liberals concern for religion social policy and education as well as their skilful use of fiscal policy shows that liberals in Germany were as sophisticated as liberals in Britain or France Even in the face of an authoritarian state structure German liberals received and made use of freedom for renewal and reform German liberalism was not inherently weak Instead the crucial problem lay in the country's complicated federal structure which made it impossible to transfer innovations from the local level to the state and national levels

The Man Who Took No Interest in Life Richard K, 2013-04 A journey through the mind of a man who saw the world from different eyes as most and how he saw himself in a busy and chaotic world

Philosophy and Living Ralph Blumenau, 2014-04-30 Philosophy can be very abstract and apparently remote from our everyday concerns In this book Ralph Blumenau brings out for the non specialist the bearing that thinkers of the past have on the way we live now on the attitude

we have towards our lives towards each other and our society towards God and towards the ethical problems that confront us The focus of the book is those aspects of the history of ideas which have something to say to our present preoccupations After expounding the ideas of a particular thinker there follows a discussion of the material and how it relates to issues that are still alive today indented from the margin and set in a different typeface based on the author s classroom debates with his own students Another feature of the book is the many footnotes which refer the reader back to earlier and forward to later pages of the book They are intended to reinforce the idea that throughout the centuries philosophers have often grappled with the same problems sometimes coming up with similar approaches and sometimes with radically different ones *The Greatest Miracle in the World* Og Mandino,2009-09-30 For the millions who have embraced Og Mandino s classic *The Greatest Salesman in the World* here is his new book which contains the amazing Memorandum from God to you A great inspirational writer tells his greatest story an amazing narrative that will hold you spellbound as it reveals exciting new secrets for your personal happiness and success Here is a simple but powerful story that will affect your thoughts and actions long after the final sentence has touched your heart You will never forget The four simple rules that can help you perform a miracle in your life The glass geranium that will break your heart The dingy parking lot where Mandino s life and yours begins again The ragpicker who rescues humans after they quit on themselves The secret of regaining the self esteem you have lost A work that will lift the mind and heart of every reader Norman Vincent Peale **Parenting Without Tears ,**

Machines Jason M. Green,2008-08-20 In the later half of the twenty first century Jobe Corithese is hired to track down some missing people who are believed to have been kidnapped He accepts this job after gaining information about the person who hired him but the fact that he is being hunted by nearly every law enforcement agency on Earth will complicate his assignment considerably So he decides to track down the only person he believes he can trust to help him complete the assignment but the only problem is that this person Sid Tyko blames Jobe for his nearly dying during their first meeting However he does agree to help Jobe but only because he is offered a large sum of money for his services Then with Sid in tow Jobe goes to join his assistant who happens to be an android who prefers to be called Gus who has been heavily modified by all of his previous owners to the point where he has developed a rather unique personality to go with his impressive set of skills The three of them then leave Earth behind and begin their search for the missing people on a space station called The Rim that orbits Earth s moon Their search takes them to various places on The Rim and then to the moon itself where they find the people they were looking for but also begin to uncover secrets that they are not meant to know They soon learn that their assignment will be anything but easy as they are pitted against criminals soldiers and people employed by various law enforcement agencies while trying to unravel a larger conspiracy that they have suddenly learned they are a part of

Natural Religion Frederick Turner,2017-07-12 There is widespread belief that the world s religions contradict each other It follows that if one religion is true the others must be false an assumption that implies and may actually create

religious strife In *Natural Religion* acclaimed poet critic and essayist Frederick Turner sets out to show that the natural world offers grounds for stating that all religions are in some respect true Through the ages various ways have been proposed to resolve religious differences Some argue for the destruction of all religions but one s own Others substitute an abstract principle for the real ritual and moral practice of religion Still others doubt all religious truth and consequently all truth Others accept a kind of pluralistic relativism This book explores syncretism whereby all religions are seen as grasping the same strange and complex reality but by very different means and handles The idea that all religions are true raises a supervening question if so what must the real physical universe be like Turner approaches these questions in terms of scientific inquiry There is not enough room in space itself to fit in all theologies but there may be enough room in time if new scientific descriptions of time s nature are to be believed Turner argues that in the time models of contemporary cosmological and evolutionary science all times may be connected and time may be infinitely branched and causally looped so that both forward in time and backward in time factors may be in operation in the same event Thus the fundamental substance of the universe may be information rather than matter or energy The universe is more like a vast living organism than a vast machine Turner argues that all existing religions can be shown to fit into this model which in turn points to deeper implications of religious doctrines languages and practices There would be plenty of room in such a view of time for a tree of different yet linked religious w
