**Bodies and Media** Ido Yavetz, 2015-08-18 This book presents a recasting of Aristotle's theory of spatial displacement of inanimate objects Aristotle's claim that projectiles are actively carried by the media through which they move such as air or water is well known and has drawn the attention of commentators from ancient to modern times What is lacking however is a systematic investigation of the consequences of his suggestion that the medium always acts as the direct instrument of locomotion be it natural or forced while original movers e.g. stone throwers catapults bowstrings act indirectly by impressing moving force into the medium Filling this gap and guided by discussions in Aristotle's Physics and On the Heavens the present volume shows that Aristotle's active medium enables his theory in which force is proportional to speed to account for a large class of phenomena that Newtonian dynamics in which force is proportional to acceleration accounts for through the concept of inertia By applying Aristotle's medium dynamics to projectile flight and to collisions that involve reversal of motion the book provides detailed examples of the efficacy and coherence that the active medium gives to Aristotle's discussions The book is directed primarily to historians of ancient medieval and early modern science to philosophers of science and to students of Aristotle's natural philosophy

An Automated Real-time Storm Analysis and Storm Tracking Program (WEATRK) Carlton J. Bjerkaas, 1980 The evolution of the WEATRK system is described from the original software obtained under contract in 1977 to the present software configuration The various portions of the software are discussed with emphasis on the algorithms used to determine storm significance and establish the storm track

Results of the two year development effort and operational tests show the usefulness of assimilating large amounts of complex data and generating a computer synthesized product easily used in forecast applications The error analysis performed on the storm track forecast accuracy suggests that few of the errors encountered are due to meteorological effects but they are largely due to parameters such as beam width pulse width antenna rotation rate and rounding errors The non meteorological errors appear to average out over large data sets that is the longer the storm track the smaller the forecast error Although the program now uses a three dimensional analysis very little analysis is performed on the velocity and variance fields The usefulness of these fields along with other improvements are considered

The Top Books of the Year End A Beginning Point The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. End A Beginning Point : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. End A Beginning Point : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. End A Beginning Point : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
