*Sovereignty in Transition* brings together a group of leading scholars from law and cognate disciplines to assess contemporary developments in the framework of ideas and the variety of institutional forms associated with the concept of sovereignty Sovereignty has been described as the main organising concept of the international society of states one which is traditionally central to the discipline and practice of both constitutional law and of international law The volume asks to what extent and with what implications this centrality is challenged by contemporary developments that shift authority away from the state to new sub state supra state and non state forms A particular focus of attention is the European Union and the relationship between the sovereignty traditions of various member states on the one hand and the new claims to authority made on behalf of the European Union itself on the other are examined The collection also includes contributions from international law legal philosophy legal history political theory political science international relations and theology that seek to examine the state of the sovereignty debate in these disciplines in ways that throw light on the focal constitutional debate in the European Union *Routledge Handbook of Regionalism & Federalism* John Loughlin, John Kincaid, Wilfried Swenden, 2013-07-18 Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the *Routledge Handbook of Regionalism and Federalism* necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive The

Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions. Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance. The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism: the EU, NAFTA and the African Union. Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars, this work will be an essential reference source for all students and scholars of international politics, comparative politics and international relations.
