Resilience and Sustainability in Urban Africa

Innocent Chirisa, Andrew Chigudu, 2021-08-02 Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development This book presents a resilience framework for sustainable cities and towns in Africa The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development Aspects of places people and process are central to the concept of urban resilience and sustainable urban growth It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond In history disasters have adversely affected nations across the world inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements The significance of urban planning and design in the growth and development of sustainable urban centres is well documented Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle This has been accompanied by problems such as overpopulation overcrowding shortages of resources and the growth of slum settlements

There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure *The Battered Woman and Shelters* Donileen R. Loseke,1992-01-01 Explores how standardized images of problems and people inform and shape social services for women who have been assaulted Gendering Women Clisby, Suzanne, Holdsworth, Julia, 2016-02-17 Available Open Access under CC BY NC ND licence Gendering Women is an engaging and accessible account of how constructions of femininity fundamentally affect women's mental wellbeing through the life course Led by women's life history accounts of growing up and growing older in the north of England this book shows how experiences of becoming and being a woman in family life education employment motherhood and situations of violence both enable and erode self confidence and esteem The challenges to women's mental wellbeing cut across age and class differences and have profound impacts on the material conditions of women's lives throughout the life course This is in turn a driver of inequality that is often under recognised in mainstream policy Based on feminist and ethnographically informed research with over five hundred women Gendering women provides a critical link between gender theory and the lived realities of women's daily lives and will appeal to students and academics in sociology and social sciences
