Murders of Mr. William Galley ... and Mr. Daniel Chater ... by fourteen notorious smugglers. With the trials ... The sixth edition, etc. [With plates.] William GALLEY,1835 **Murder and Politics in Mexico** Sara Schatz,2011-02-28 Murder and Politics in Mexico studies the causes of political killings in Mexico s liberalization democratization within the larger context of political repression Mexico s democratization process has entailed a little known but highly significant cost of human lives in pre and post election violence The majority of these crimes remain in a state of impunity in other words no person had been charged with the crime and or no investigation of it had occurred This has several consequences for Mexican politics when the level of violence

is extreme and when political killings that are systematic and invasive are involved this could indicate a real fracture in the democratic system This book analyzes several dimensions regarding impunity and political crime more specifically the political killings of members of the PRD in the post 1988 period in Mexico The main argument proposed in this book is that impunity for political killings is a structured system requiring one central precondition namely the failure of the legal system to function as a system of restraint for killings Dr Schatz s research finds that political assassinations are indeed rational targeted actions but they do not occur within an institutional vacuum Political assassinations are calculated strategies of action aimed at eliminating political rivals As a form of interpersonal violence political assassination involves direct or implied authorization from political leaders the availability of assassins for hire and the willingness of some political leaders to utilize them against political opponents and violent interactions between political parties combined with judicial system ineffectiveness A corrupt legal system facilitates the use of political assassination and explains the persistence of impunity for political murder over time To reduce political violence in the transition to electoral democracy specific institutional conditions namely a structured system of impunity for murder must be overcome **DeathQuest** Robert M.

Bohm,2011-07-23 This fourth edition of the first true textbook on the death penalty engages the reader with a full account of the arguments and issues surrounding capital punishment The book begins with the history of the death penalty from colonial to modern times and then examines the moral and legal arguments for and against capital punishment It also provides an overview of major Supreme Court decisions and describes the legal process behind the death penalty In addressing these issues the author reviews recent developments in death penalty law and procedure including ramifications of newer case law such as that regarding using lethal injection as a method of execution The author s motivation has been to understand what motivates the deathquest of the American people leading a large percentage of the public to support the death penalty The book will educate readers so that whatever their death penalty opinions are they are informed ones Comprehensive unbiased review of developments in death penalty law and procedure including new case law on death eligible crimes and execution by lethal injection Current data on costs miscarriages of justice discriminatory application religion and death penalty public opinion Analysis of new research regarding the effectiveness of the death penalty in terms of deterrence retribution and incapacitation

of the art contributions of theoretical empirical policy related scholarship on the intersection of perceptions of crime victimisation vulnerability and risk This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating Research on fear of crime is demonstrative of the inter disciplinarity of criminology drawing in the disciplines of sociology psychology political science history cultural studies gender studies planning and architecture philosophy and human geography This collection draws in many of these interdisciplinary themes This collections also extends the boundaries of fear of crime research It does this both methodologically and conceptually but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives The book begins by plotting the history of fear of crime s development then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions Key elements in debates and research on fear of crime concerning gender race and ethnicity are covered as are contemporary themes in fear of crime research such as regulation security risk and the fear of terrorism the mapping of fear of crime and fear of crime beyond urban landscapes The final sections of the book explore geographies of fear and future and unique directions for this research
