Recognizing Justice for Citizens with Cognitive Disabilities

Kacey Brooke Warren, 2015-01-30 Although undeniably subject to the coercive political institutions of a liberal state citizens with cognitive disabilities have frequently and without justification been denied political equality and political liberty Rather than opposing this treatment philosophers have tacitly condoned it often by silence and other times by explicitly neglecting the concerns for justice that these citizens have In *Recognizing Justice for Citizens with Cognitive Disabilities* Kacey Brooke Warren searches for a theory of justice that can adequately address these concerns Students and scholars of philosophy political theory and disability studies will benefit from Warren's discussion of four of the most influential contemporary theories of justice and her analysis of which of the four is most promising for extending political equality and political liberty to citizens with cognitive disabilities

Epistemic Responsibility for Undesirable Beliefs Deborah K. Heikes,2023-09-21 This book considers whether we can be epistemically responsible for undesirable beliefs such as racist and sexist ones The problem with holding people responsible for their undesirable beliefs is first what constitutes an undesirable belief will differ among various epistemic communities second it is not clear what responsibility we have for beliefs simpliciter and third inherent in discussions of socially constructed ignorance like white ignorance is the idea that society is structured in such a way that white people are made deliberately unaware of their ignorance which suggests their racial beliefs are not epistemically blameworthy This book explores each of these topics with the aim of establishing the nature of undesirable beliefs and our responsibility for these beliefs with the understanding that there may well be rare

occasions when undesirable beliefs are not epistemically culpable A Companion to Applied Philosophy Kasper Lippert-Rasmussen, Kimberley Brownlee, David Coady, 2016-11-14 Applied philosophy has been a growing area of research for the last 40 years Until now however almost all of this research has been centered around the field of ethics A Companion to Applied Philosophy breaks new ground demonstrating that all areas of philosophy including epistemology metaphysics philosophy of science and philosophy of mind can be applied and are relevant to questions of everyday life This perennial topic in philosophy provides an overview of these various applied philosophy developments highlighting similarities and differences between various areas of applied philosophy and examining the very nature of this topic It is an area to which many of the towering figures in the history of philosophy have contributed and this timely Companion demonstrates how various historical contributions are actually contributions within applied philosophy even if they are not traditionally seen as such The Companion contains 42 essays covering major areas of philosophy the articles themselves are all original contributions to the literature and represent the state of the art on this topic as well as offering a map to the current debates

Relational Remembering Sue Campbell, 2003-10-07 Tracing the impact of the memory wars on science and culture Relational Remembering offers a vigorous philosophical challenge to the contemporary skepticism about memory that is their legacy Campbell's work provides a close conceptual analysis of the strategies used to challenge women's memories particularly those meant to provoke a general social alarm about suggestibility Sue Campbell argues that we cannot come to an adequate understanding of the nature and value of memory through a distorted view of rememberers The harmful stereotypes of women's passivity and instability that have repopulated discussions of abuse have led many theorists to regard the social dimensions of remembering only negatively as a threat or contaminant to memory integrity Such models of memory cannot help us grasp the nature of harms linked to oppression as these models imply that changed group understandings of the past are incompatible with the integrity of personal memory Campbell uses the false memory debates to defend a feminist reconceptualization of personal memory as relational social and subject to politics Memory is analyzed as a complex of cognitive abilities and social narrative activities where one's success or failure as a rememberer is both affected by one's social location and has profound ramifications for one's cultural status as a moral agent *Transforming Graduate Biblical Education* Elisabeth Schüssler Fiorenza, Kent Harold Richards, 2010 This unique collection of essays originating in seminars held at SBL's Annual and International Meetings explores the current ethos and discipline of graduate biblical education from different social locations and academic contexts It includes international voices of well established scholars who have urged change for some time alongside younger scholars with new perspectives The individual contributions emerge from a variegated set of experiences in graduate biblical studies and a critical analysis of those experiences The volume is divided into four areas of investigation The first section discusses the ethos of biblical studies and social location and the second explores different cultural national formations of the discipline The third section considers the

experiences and visions of graduate biblical studies while the last section explores how to transform the discipline All the contributions offer ways to transform graduate biblical education so that it becomes a socializing power that in turn can transform the present academic ethos of biblical studies Back cover

differences within the realms of scholarly inquiry and theory construction *Foundations and Applications of Social Epistemology* Sanford Goldberg, 2021 This volume collects twelve essays by Sanford C Goldberg on the topic of social epistemology The first half develops a proposal for a programme for social epistemology the second focuses on applications of this programme to topics like testimony inquiry and epistemic aspects of social norms *The Fight Against Doubt* Inmaculada de Melo-Martín, Kristen Intemann, 2018-07-02 The lack of public support for climate change policies and refusals to vaccinate children are just two alarming illustrations of the impacts of dissent about scientific claims Dissent can lead to confusion false beliefs and widespread public doubt about highly justified scientific evidence Even more dangerously it has begun to corrode the very authority of scientific consensus and knowledge Deployed aggressively and to political ends some dissent can intimidate scientists stymie research and lead both the public and policymakers to oppose important public policies firmly rooted in science To criticize dissent is however a fraught exercise Skepticism and fearless debate are key to the scientific process making it both vital and incredibly difficult to characterize and identify dissent that is problematic in its approach and consequences Indeed as de Melo Martín and Intemann show the criteria commonly proposed as means of identifying inappropriate dissent are flawed and the strategies generally recommended to tackle such dissent are not only ineffective but could even make the situation worse The Fight Against Doubt proposes that progress on this front can best be achieved by enhancing the trustworthiness of the scientific community and by being more realistic about the limits of science when it comes to policymaking It shows that a richer understanding of the context in which science operates is needed to disarm problematic dissent and those who deploy it This the authors argue is the best way forward rather than diagnosing the many instances of wrong headed dissent **Structural Injustice** Madison Powers, Ruth Faden, 2019-08-30 Madison Powers and Ruth Faden here develop an innovative theory of structural injustice that links human rights norms and fairness norms Norms of both kinds are grounded in an account of well being Their well being account provides the foundation for human rights explains the depth of unfairness of systematic patterns of disadvantage and locates the unfairness of power relations in forms of control some groups have over the well being of other groups They explain how human rights violations and structurally unfair patterns of power and advantage are so often interconnected Unlike theories of structural injustice tailored for largely benign social processes Powers and Faden's theory addresses typical patterns of structural injustice those in which the wrongful conduct of identifiable agents creates or sustains mutually reinforcing forms of injustice These patterns exist both within nation states and across national boundaries However this theory rejects the claim that for a structural theory to be broadly applicable both within and across national boundaries its central claims must be universally endorsable Instead Powers and Faden find support for their theory in examples of structural injustice around the world and in the insights and perspectives of related social movements Their theory also differs from approaches that make enhanced democratic decision making or the global extension of republican institutions the centerpiece of proposed remedies Instead

the theory focuses on justifiable forms of resistance in circumstances in which institutions are unwilling or unable to address pressing problems of injustice The insights developed in Structural Injustice will interest not only scholars and students in a range of disciplines from political philosophy to feminist theory and environmental justice but also activists and journalists engaged with issues of social justice **The Politics of Survival** Lara Trout, 2010 This is a brave book balancing strong scholarship clear organization and a provocative reading Peirce Roger Ward Georgetown College
