Defence from Floods and Floodplain Management John Gardiner, Odon Starosolszky, V. Yevjevich, 2012-12-06 Defence from Floods and Floodplain Management discusses all aspects of floodplain management related to defence from floods including specific issues such as the maintenance of flood defences and reveals many aspects of a more holistic approach to the management of flood risk expanding the structural non structural debate into prevention and cure in the floodplain and its catchment Recent experience in many countries is recounted by experts from Hungary Austria Greece Italy the Netherlands Portugal the UK and the USA Hydrology in Practice Elizabeth M. Shaw, Keith J. Beven, Nick A. Chappell, Rob Lamb, 2017-12-21 Hydrology in Practice is an excellent and very successful introductory text for engineering hydrology students who go on to be practitioners in consultancies the Environment Agency and elsewhere This fourth edition of Hydrology in Practice while retaining all that is excellent about its predecessor by Elizabeth M Shaw replaces the material on the Flood Studies Report with an equivalent section on the methods of the Flood Estimation Handbook and its revisions Other completely revised sections on instrumentation and modelling reflect the many changes that have occurred over recent years The updated text has taken advantage of the extensive practical experience of the staff of JBA Consulting who use the methods described on a day to day basis Topical case studies further enhance the text and the way in which students at undergraduate and MSc level can relate to it The fourth edition will also have a wider appeal outside the UK by including new material on hydrological processes which also relate to courses in geography and environmental science departments In this respect the book draws on the expertise of Keith J Beven and Nick A Chappell who have extensive experience of field hydrological studies in a variety of different environments and have taught undergraduate hydrology courses for many years Second and final year undergraduate and MSc students of hydrology in engineering environmental science and geography departments across the globe as well as professionals in environmental protection agencies and consultancies will find this book invaluable It is likely to be the course text for every undergraduate MSc hydrology course in the UK and in many cases overseas too Soluble Materials in Civil Engineering Anthony Noel James, 1992 Using a quantitative approach this book examines the dissolution of soluble materials in engineering structures It aims to provide quantitative design methods for safe structures encompassing soluble minerals concrete and other man made materials of construction Structural Engineering William Addis, 1990 Challenging the conventional view that engineering design has its roots in theory and consists in the application of theory in practice this book aims to increase awareness of the philosophy of engineering amongst practising engineers students and academics **Hydrology** Ian Watson, 2017-11-13 Hydrology covers the fundamentals of hydrology and hydrogeology taking an environmental slant dictated by the emphasis in recent times for the

remediation of contaminated aquifers and surface water bodies as well as a demand for new designs that impose the least negative impact on the natural environment Major topics covered include hydrological principles groundwater flow groundwater contamination and clean up groundwater applications to civil engineering well hydraulics and surface water Additional topics addressed include flood analysis flood control and both ground water and surface water applications to civil engineering design
