*Finding God in the Space Age* Thomas A. Bolten, 1986-06-01      **No Requiem for the Space Age** Matthew D.

Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with blasting ever more men to the moon **No Requiem for the Space Age** offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change      **Finding God in a World Come of Age** Roger Haight, Alfred Pach, Amanda Avila Kaminski, 2024-05-07

During his days in prison in Berlin Dietrich Bonhoeffer had time to read and reflect on the Enlightenment and to ask the question of how Christians might live in a world come of age One can interpret Karl Rahner's theological and pastoral writing as addressing that question Born in 1904 he lived through both World Wars to a ripe age of 80 and wrote 1651 published works Although his writing had a unique historical genesis and intellectual setting along with a technical vocabulary he consistently wrote out of pastoral concern in an effort to make Christian faith and belief credible in his Western European culture and the new post WWII context Probably his most important student was Johann Baptist Metz who was born in Germany 1928 conscripted into the army as a teenager and after it turned to the seminary and to theology He studied with Rahner in Innsbruck and received his doctorate in theology in 1961 and taught at the University of Münster for thirty years As Dorothee Soelle converted Bultmann's existential analysis into social commitments so did Metz give new social meaning to Rahner's transcendental theology in a time of social cataclysm Thus together Rahner and Metz not in competition but as

complementary offer a distinctive response to the spiritual question of finding God in the present day secular world     *The Space Age Tarot Book* Alfred Schmielewski, Yogi A.S. Narayana, Love is the highest point of wisdom The Space Age Tarot Two of Cups Card After casting the great oracle the consultee should meditate on the two great pyramids in front of him and let visions and intuitions rise from within his unconscious He should then immerse himself into the innermost depths of the great ocean of the unconscious From the Great Pyramid Reading The pyramid features an oracle covering the human life in its entirety from the moment of birth to the moment of death     Science and the Search for God Gary A. Kowalski, 2003 Harvard educated theologian Gary Kowalski argues that many of the ills of the modern world from the rise of fundamentalist intolerance to secular society's endless and empty search for thrills stem from the mistaken view that science and faith are antagonists rather than natural allies Both science and faith the author suggests compel us now to move beyond materialism toward an understanding of the world that includes the realities of consciousness and spirit In the twenty first century human beings have less reason than before to feel they hold a privileged or special position in the cosmos but more cause than ever to feel connected and akin to all that is Christians and Jews skeptics and seekers alike will find that this brief persuasively written volume sheds new light on the old questions Who are we Where do we figure in the larger scheme of things And what can we honestly believe     *A Dictionary of the Space Age* Paul Dickson, 2009-05-18 2009 Outstanding Academic Title Choice The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What's more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age Aviators fighter pilots and test pilots coined the phrases spam in a can how astronauts felt prelaunch as they sat in a tiny capsule atop a rocket booster tickety boo things are fine and the Eagle has landed Neil Armstrong's famous quote when Apollo 11 landed on the Moon This dictionary captures a broader foundation for language of the Space Age based on the historic principles employed by the Oxford English Dictionary and Webster's New Third International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs     *To Touch the Face of God* Kendrick Oliver, 2013-01-15 Was the space program the signature project of secular modernity or a symbol of humankind's perpetual quest for communion with God In the beginning God created the heavens and the earth In 1968 the world watched as Earth rose over the moonscape televised from the orbiting Apollo 8 mission capsule Radioing back to Houston on Christmas Eve astronauts recited the first ten verses from the book of Genesis In fact many of the astronauts found space flight to be a religious

experience To Touch the Face of God is the first book length historical study of the relationship between religion and the U S space program Kendrick Oliver explores the role played by religious motivations in the formation of the space program and discusses the responses of religious thinkers such as Paul Tillich and C S Lewis Examining the attitudes of religious Americans Oliver finds that the space program was a source of anxiety as well as inspiration It was not always easy for them to tell whether it was a godly or godless venture Grounded in original archival research and the study of participant testimonies this book also explores one of the largest petition campaigns of the post war era Between 1969 and 1975 more than eight million Americans wrote to NASA expressing support for prayer and bible reading in space Oliver s study is rigorous and detailed but also contemplative in its approach examining the larger meanings of mankind s first adventures in the heavens

Hayes, 2024 Since its inauguration in 1960 Brazil s capital city Bras lia has become an internationally recognized center for eclectic forms of modern mysticism Among the dozens of New Age Spiritist esoteric and occult communities that have sprouted in the city and its environs the most spectacular is the Valley of the Dawn Vale do Amanhecer Equal parts religious movement enchanted city utopian vision and theatrical spectacle the Valley of the Dawn is a unique psychic ecosystem Community members consider themselves the spiritual descendants of an ancient race of extraterrestrials originally sent to galvanize humanity s cultural and spiritual

evolution Wearing dazzling garments that reference their past lives in different cultural eras adherents perform daily ceremonies for karmic redemption and offer spiritual healing services free of charge to the public The Valley of the Dawn was founded by a charismatic spirit medium called Aunt Neiva a widowed mother of four who came to Brasilia in 1957 to work in the construction of the new capital city Over two decades Aunt Neiva established a spiritual metropolis that today is home to over 25 000 people and the headquarters of a global religious movement with more than 800 affiliated temples worldwide Spirits of the Space Age details the Valley's historical emergence placing it within the context of mid twentieth century Brazil and explores its imagined world the imaginative and collectively shared representations that foster a common sense of identity meaning and purpose among Valley members Drawing on extensive ethnographic fieldwork it offers a narrative portrait of a new religious movement as seen in and through the lives of Aunt Neiva her most important collaborators and contemporary adherents By presenting a more complete picture of the Valley of the Dawn this book counters the persistent media representations of the Valley as a cult But it also illuminates how religious movements respond to their place and time even as they situate themselves in relationship to imagined otherworlds and times

**Developmental Psychology and Young Children's Religious Education** Olivera Petrovich, 2022-12-16 Developmental Psychology and Young Children's Religious Education sets out to identify the conceptual pre requisites for young children's religious education learning and clearly highlights the challenges that children and their teachers encounter in the RE educational process Based on a study with 431 children aged 5 to 7 years from different schools faith and non faith and 47 teachers from the same schools as the children this book offers an insightful look into younger children's religious education providing statistical evidence to dismantle the belief that young children lack the ability to conceptualise God in

abstract terms The information obtained from these children and their teachers reveals a major discrepancy between the teachers perceptions of young children s conceptual abilities for RE learning on the one hand and children s actual abilities revealed in their responses throughout the study on the other Based on the evidence described in the volume Petrovich argues that teacher training courses for primary RE need to be designed to include a substantial component of contemporary developmental research that is of direct relevance to children s conceptual abilities and understanding of abstract concepts Developmental Psychology and Young Children s Religious Education is essential reading for students and researchers in developmental psychology religious education teacher education education studies and cultural anthropology [Space-age Sunday](#) Hiley H.
